

## Review Diretta

### Diretta.it

The mobile application that offers you the most accurate and fastest sports results. Diretta has more than 6000 competitions spread throughout the world, of which more than 1200 are football. Know the classification and goals of all the live matches in an updated way

Never again miss how the game of your favorite team is going. Soccer is the king of sports all over the world, that's why there are millions of leagues playing simultaneously all over the planet. Following that level of competitions is very complicated, especially due to the differences in timetables and geography. But that today is not a problem, since there are numerous mobile applications that help you keep up to date with everything that happens live in the different confrontations, as is the case with **Diretta**.

It is part of a group of live sports scores websites and has more than 50 million monthly users. Its great feature is to offer its loyal followers the results live in the fastest and most accurate way there is, in this sense no other app equals its results. **Download Diretta free**, you find it available for **Android** and **iOS**, in the main virtual stores, Google Play Store and App Store.

Its mobile application shares the design of its web version, so you will find everything you need in the same way, so you do not get lost browsing it. With a very clear interface, its main distinguishing mark is the live results of all the competitions that are being played at the moment. It has a great coverage, not only football, of up to 33 different sports, including tennis, basketball, handball or golf among many others. Look for your favorite competition, you will surely find it here.

It covers more than 6000 leagues and tournaments around the world, adding to the more than 1200 football-only competitions it has. This means that you not only find professional championships, in Diretta you will also have other confrontations between lower categories of semi-professionals. This type of competition is very difficult to follow since the media does not cover them because they do not have so much follow-up, but with this application you will have no problem following that team that is in a local category and that you cannot find another means to know how is your meeting going.

Any event that occurs in the game will be notified on your phone, you will not miss anything. This happens not only with goals, a red card, a foul, an injury, the end of a period, etc., you will find out everything that happens at the same time it happens.

You can make your own lists of favorite teams and competitions, in this way you will not have to waste your time searching each time you enter the application, and also only the notifications of these that you have marked will arrive. They are fully customizable, if there is an event that does not interest you that reaches you, you only have to go to the notification settings and select those that really interest you.

One of the **advantages of Diretta** is the synchronization of its multiple versions. It doesn't matter which device you're following it on, with your account data, everyone will be connected so you don't miss anything. To start enjoying this and other benefits, all you have to do is install it on your mobile device and create a personal account. It is totally safe and with it you will know first-hand everything you want about your favorite sport and team.

You will know before the team line-ups begin, in this way you will know before anyone else the players who are going to jump onto the pitch. If you can't watch it on TV, now it's not a problem. With this app you will have the feeling of

living the game live, like any spectator in the stadium.

But not only do you have the formations live, you also have the possibility to consult the data of previous clashes of the teams, data of the players, the classification table of the competition and all those historical data that you want to know, a very complete previous of each of the competitions.

**Download Diretta**, you will have the rankings constantly updated. Because a goal can change the situation a lot, that is why these live tables will tell you whether or not this modifies the positions of the teams and that of the scorers in the league itself.

Pros	Cons
<ul style="list-style-type: none"><li>- The speed of updating bookmarks.</li><li>- They have competitions of lower categories.</li><li>- All kind of sports.</li><li>- Leagues around the world.</li></ul>	<ul style="list-style-type: none"><li>- Some leagues are not updated.</li><li>- There is no detailed information of the players.</li><li>- The historical data does not go further than the last clashes.</li><li>- Sports that are not soccer do not have as many events.</li></ul>
