

## Review Google Meet

**Google LLC**

Google Meet is Google's business video calling service. From 2020 it is available free for all users. It has advanced configuration options, supports up to 250 participants, has sound cancellation functions and can be used directly from the app or through the website

We are in the age of video calls. All the **Android and iOS** apps that provide these types of services have been the stars of 2020. Many changes were experienced around these tools. From important modifications in their security codes such as the enabling of programs that went from being paid or premium to becoming a **free app**.

Among the most outstanding offers we now have the possibility of **using Google Meet for free**. The platform that Google offered for business services is now enabled for all users for free, easily accessible and very simple to use. Such and such the company of the powerful search engine has us accustomed.

One of the **advantages of Google Meet** is that it has the Google seal. This means that it is a very easy to use product and compatible with most computers, browsers and mobile terminals. It can be used from the website or the in-app version is available to install on phones.

The video calling program supports up to 250 participants and has the ability to seamlessly connect with all other Google services. For example, the user can start a conversation from their Gmail account or add them to the Google Calendar. From there you will have the chance to invite other people, attach files to review in the meeting and generate a link to share at the time the call is held. In addition, when configuring the connection you can know if the rest of the participants are available or not on the date and time that the communication will take place.

When **downloading Google Meet** we will find a proposal that allows a large number of configurations during conversations. It is possible to adjust the video quality of both the speaker and those we are watching. At the same time, in addition to sharing screen, documents and presentations, you can activate a chat while others are talking. Another of the points that Google has better reinforced is the sound cancellation option, which significantly improves the audio of video calls.

The security of your meetings is guaranteed with this tool. Communications have advanced encryption so there are no leaks. Security technology is constantly updated to avoid attacks. You will also have the ability to **record video calls with Google Meet**. If you activate the option to record what happens during the conversation, the video file will be sent directly to Google Drive.

The maximum duration of each meeting is 60 minutes but can be extended if necessary. Along with the most useful functions that we can highlight, we also find the possibility of adding subtitles to the talks if necessary as well as adjusting the design of what we are seeing on the screen. In any case, the program is configured by default to focus on the user who has the most activity in the conversation.

Before starting the video call you must be sure that your sound and image work perfectly and you can control it on the preview screen. At that time you will have the opportunity to adjust your image, sound and definition in general. In addition, Google Meet offers users control during communications, being able to set, silence or remove users if they wish.

Being able to **use Google Meet** is one of the great advantages that Google has added during the year. The service has been working well among the world's leading companies for a long time and now it reaches all users. The ability to interact with all other Google services is one of the highest points that allows you to stay updated,

organized and connected.

The encryption protocols and protection of the talks make Google Meet one of the safest alternatives on the market. In addition, the possibility of accessing it on any of your devices will allow you to organize your communications in the best way possible.

Google Meet can be easily adapted to entities with different functions, whether they are companies, schools or non-profit organizations.

Pros	Cons
<ul style="list-style-type: none"><li>- Sound cancellation function.</li><li>- Supports up to 250 participants.</li><li>- Free service.</li><li>- Interaction with other Google services.</li></ul>	<ul style="list-style-type: none"><li>- You have to use a Google account</li><li>- Some problems in the operation</li><li>- The phone app needs some improvements</li><li>- It may present problems to recognize the meetings</li></ul>
