

## Review HBO Max Warner Media Entertainment

Seeing what you want ad-free is the concept of HBO Max, the new streaming platform that uses the pay-as-you-go model and you will have access to original content, including TV shows, movies, etc. You can also enjoy the entire Warner Media productions portfolio

HBO, owned by Warner Media, has already launched its new streaming service called HBO Max, which will include much more content than is currently available on the independent HBO app.

But what is HBO Max and what can you expect when it launches in May 2020?

Here is everything you need to know when **Downloading HBO Max**. HBO Max will debut in May 2020 for \$ 4.99 a month, including everything available on HBO's current streaming service, which means original HBO **series** like Game of Thrones, Westworld, The Sopranos, Cheroboyl, Veep, Euphoria etc.

This also means the entire **movie** catalog you have on your HBO catalog. What is added is a massive Warner Media TV library that covers a lot of ground. Warner Brothers Studios, TNT, CNN, DC Entertainment, Cartoon Network, Turner Classic Movies, Rooster Teeth, and New Line.

Perhaps the biggest shake-up for streamers everywhere is that the entire FRIENDS series will move to HBO Max exclusively at launch. That means if you're currently stuck with Rachel, Chandler, and the gang on Netflix, you'll have to rethink your streaming subscriptions in the spring.

Other exclusive licensed content coming to HBO Max includes The Fresh Prince of Bel-Air, The Big Bang Theory, and Pretty Little Liars. The latter is another Netflix snack. All current and future seasons of BBC Doctor Who will also be featured exclusively on HBO Max. Don't count the deep well of Warner animation, the Looney Tunes catalog, Rick and Morty and South Park are just a few of the heavyweights destined for the new streaming service.

HBO Max will become the exclusive venue to stream all Warner Brothers-produced CW dramas like Batwoman and upcoming Riverdale spin-off Katie Keene. The episodes of the CW shows will be available to stream 30 after their traditional television premiere, which is a bit more expected than Windows on Netflix today.

Bringing the Warner Brothers catalog together in one place means tons of **movies** at your fingertips, including everything in the extended DC universe. Other franchises include The Matrix, Godzilla, King Kong, and of course the Hobbit Trilogy and The Lord of the Rings.

Another big hit from HBO Max are the exclusive streaming rights to all of Studio Ghibli's animated films like Princess Mononoke, Spirited Away, My Neighbor Totoro and many more. This will be the first time that these masterpieces will be streamed to shake up the anime scene. An important exception here is Harry Potter, which will not appear on HBO Max - the exclusive rights to that Wizarding World of movies belong to NBC Universal until 2025.

### What would a new streaming service be without new exclusive shows and movies?

Production company J.J Abrams has signed a \$ 150 million production deal to create original programming for HBO Max. The producer of Reese Witherspoon, at least two original films. Greg Berlanti, the producer of The CW's Superhero shows, is planning a handful of movies for young adults, and director Steven Soderbergh has an exclusive movie full of stars in the works.

Expect to see a reboot of Gossip Girl and the animated Gremlins prequel, a romantic comedy by Paul Greig and Anna Kendrick and a highly anticipated adaptation of the science fiction classic Dune. There's a lot to look forward to with HBO Max and probably a few more unanswered questions. One thing you can take for granted is that HBO values high-quality content and has scale and scope.

The Warner Brother Studios have almost 100 years of history to this day. By 1923 it was already one of the most well-known iconic studios worldwide, with the launch of the **HBO Max app** they want to make a clear statement that they are fully committed to continuing the great legacy of storytelling on HBO Max. After four years of HBO Now's success and reaching 40% of its users through digital streaming, they really experienced a huge advantage when it came to user experience.

Regardless, HBO is one of the strongest high-quality brands and they have many partners that help them in distribution in many countries abroad (more than 150 countries). You can't find another streaming platform that has more Emmy Awards than HBO.
