

## Review Apex Legends

### Electronic Arts, Respawn Entertainment

If you are looking for a new fps battle royal game, you should definitely download Apex Legends. One of the best games of 2019 that has reached 50 million players in just one month! In this guide I will explain what are the Apex legends and the main features of the game

If you are looking for a new game where you can spend hours of games without getting tired, **Apex legends is what you were looking for!**

Apex Legends is a new free-to-play (therefore totally free) battle royale game developed by Respawn Entertainment under Electronic Arts, only this should already attract attention.

EA is one of the best game developers, of various kinds. The new apex legends is based on the model to which almost all the new FPS games are directed, but it is not only this that determines its success, in fact, the game was released in early February and in a few weeks broke all records, reaching 25 million users and a maximum of 2 million at the same time.

According to Respawn entertainment, Apex offers a gaming experience in its style, relying heavily on its jewel Titanfall 2, in fact, the world of **Apex** is also that of Titanfall, as well as the very weapons and dynamics of the game, the game Then follows the path taken by PUBG and Fortnite, but with important differences, which in my opinion will make this game a great success.

In this game, we can find that legends are quite cool characters and that each legend has unique abilities and stories. All legends are divided into three groups: Offensive, Defensive, Support, and Recon Legends.

Like many other Battle Royale type games, you must choose the place where you will start the game and you must choose a suitable one. Looting around the 500-meter range is the most optimal way to do it and all you have to do is look directly where you want to land. You are falling anywhere from the range of 700 to 1000 meters, use the Dolphin diving method to maximize speed and distance, and really know how to get to where you want to be. Don't forget to look around you to get an idea of ??how many teams are landing nearby. As you fall, be sure to branch out to your teammates so they don't come out of their loot and don't go into yours. Just make sure you're close in case they get into an early fight. Instead of healing in fights, you can grab hot-swap armor if you can and continue.

Some pistols may seem silly, but you really care about getting better, you should wear masks that aren't too crowded. If you ping something your teammate wants and it's a bit far away rather than wasting more time looting, pick it up. them if you have space. Don't forget that this game is all about efficiency. Doors are one of the most useful tools in this game. You can block people from opening them if you are on the road giving you time to heal or even recharge.

Also, if you know someone is blocking the doors, grenades can easily blow up doors, and the termination grenade can damage the door and hit people who are healing behind it. Just don't hurt yourself with your own termite. Another good tip will be to stop your habit of always thirsting for fallen enemies. Just try to kill them all, especially when your team is still fighting.

If you are thirsty, be enemies with high-value items like gold armor or especially gold takedowns as they can sell

supply themselves. The best way to quickly thirst is to use a thermite grenade. It is not so recommended to use a finisher unless you know for sure that you are safe or the last member of your squad with a golden shield. Finishers are really useful now because they replenish their shields.

The first storm may seem scary, but don't be afraid to fight if your enemies are easy targets. You won't die as easily in the first storm, but make sure you have syringes and medicine cabinets. But the last storms are a different story that you should avoid at all costs. The last tip will be to divide the duties when reviving to save time. If your teammate is dead, one of them can grab the banner and the other can revive instead of both grabbing the banner and both reviving.

Pros	Cons
<ul style="list-style-type: none"><li>- First person fps.</li><li>- Very good graphics.</li><li>- Team cooperation</li><li>- It is Free.</li></ul>	<ul style="list-style-type: none"><li>- Lack of game modes</li><li>- Limited number of legends.</li><li>- Some objects are too expensive, being very difficult to access without having to pay in exchange, no matter how much you play</li></ul>
