

## Review Clash of Kings

### Elex Wireless

Clash of Kings is a multiplayer role-playing game for real-time online battles. We will find ourselves in charge of a castle, its buildings and the inhabitants of the city. We can fight epic battles and dedicate ourselves to leveling up the constructions within our kingdom

**Clash of Kings** is a multiplayer role-playing game developed by Elex Wireless for mobile devices with **Android and iOS** systems. We are facing a war proposal, with attacks and defenses in real time. We will also have to manage our kingdom and take care of the central castle.

By **downloading Clash of Kings** for free we will make ourselves a castle where all the internal part within the wall make up the buildings of our kingdom; Outside the walls we have the area of ??farms in which they produce different resources such as food or wood. All constructions pass levels and release more materials such as iron. By obtaining it we will be able to build infirmaries and military stores.

For those who, when **playing Clash of Kings**, dedicate themselves more than anything to combat and battle, it is necessary to have many farms. It also takes between 8 and 10 infirmaries so as not to lose the troops. Military tents are also essential as they train and upgrade the troops you have. The more trained the soldiers are, the better. You also have a factory where you can produce the materials for forging, you can choose the resources and it tells you how long it takes to make each one of them. It is generally two hours, although there are also elements within the game that allow us to speed up this time.

One of the **advantages in Clash of Kings** is the presence of ships that bring rewards. It is up to you to collect it because sometimes going for it consumes a lot of resources and then what you earn is not so much so you may have to evaluate well if it is convenient to go or not.

Among the buildings we have, we begin with the Wall. This gigantic wall allows you to see the traps that it has as well as the defense, the latter represents the life that the castle has. When the defense reaches zero, the castle must be moved to another location. Every time you receive an attack the defense decreases.

We also have the watchtower. This construction, as we increase in level, will offer us very important information to advance in the game. However, it is not one of the buildings to which we should pay more attention from the beginning.

Within our city we have the field of instructions that allows us to increase the deployment capacity, for example when an army is sent you can increase the number of soldiers since the number you can present is limited.

On the other hand, the merchant cart has new offers every 24 hours every day. Sometimes there is resource delivery or it gives you cards that can be exchanged for in-game items. The content is updated only every day and you can see if it has elements that you find useful.

At level 9 the Market is released in which one can exchange resources with other members of the alliance.

Participating in the market has a fee, which decreases as we advance through the level.

Then we have the Source of Wishes which every day at the time the server restarts, and depending on the level we have reached, will offer you free wishes. With these you can obtain wood, food, iron, steel and mithril. Wishes can also be accessed by using gold.

In another sector of the exciting world of Clash of Kings you have the Port. Here you will find all kinds of rewards on a regular basis.

There is a market for novice material which awards prizes for a week if you collect them every day, it is convenient to

get them because it is only for the first week that you get this **free app**.

There is a registration ship in the port with which we must go every week to collect the different rewards, the important thing is to go every day because if you stop going for a single day the counter is reset and returns to the beginning. Each time it will give better objects.

We also have the embassy where we receive reinforcements from other members or help other users. It is a proposal where the help between players of the same alliance is very important.

Clash of Kings is one of the best alternatives among **games and applications** of its kind.

Pros	Cons
<ul style="list-style-type: none"><li>- Very entertaining.</li><li>- Very large community.</li><li>- Free download.</li><li>- Content updated on a regular basis.</li></ul>	<ul style="list-style-type: none"><li>- Server problems.</li><li>- Sometimes you have to spend money to have a better gaming experience.</li><li>- It can be confusing at first.</li><li>- It is necessary to improve the pairing of players between weak and strong.</li></ul>
