**Review Coin Master**
**Moon Active**
Coin Master is a mobile application that can be played with your Facebook friends. Spin the wheel, collect the cards you find and get rewards with which to build your own village and protect it from attacks while destroying the populations of other players to advance in the ranking

**Coin Master** is a single player entertainment game that is compatible with **Android** and **iOS**. Developed in 2016 by **Moon Creative Studio**, it has great interest from the public and is well positioned on several lists of the most downloaded applications. It has an adventurous spirit and aesthetically it looks very good, with good graphics and good characters, like a Rhino pet that can help you as a guard. As you progress, you will face many more challenges in the 22+ levels currently available. You will see how unique and thematic all your adventures are on the map.

To be able to play, you just have to **download Coin Master for free** on your mobile device and create an account that you can also do by linking it to your **Facebook** profile, which will make it even more social and will allow you to take it to any other device other than the usual one. It is completely free, but has a number of purchase options within the application

Once you are inside **Coin Master**, the first thing that will appear is a slot machine, this will give you spins where you can get coins to start the game. But not only do you have the possibility of earning money, you can also get objects that will help us in the future, such as shields and hammers with which we will defend ourselves and attack.

In addition, you have the possibility of three little pigs appearing and that means that you will have to overcome a minigame in which you will go face to face with the **Coin Master** himself. If you manage to be victorious, you will also receive coins with which to continue growing your town.

There are many interesting symbols, but the most important is to get 3 equal rotations of the machine. Don't worry if you can't win 3 the first time, because you still always win something.

As a good social game that it is, **Coin Master** has a series of free spins a day just for entering and if that is not enough, you have a lot of friends in the application that you can ask for help.

And to make this even more exciting, you have the challenge of collecting different cards, some rarer than others, will you be able to get them all? Collect them to complete decks that allow you to advance through the villages, you can also exchange them with other players in the **Coin Master** community on Facebook. Another advantage of your strategy would be the ability to develop the talent of one of the three types of pets, they can be very useful in finding additional coils or keeping you awake for a long time.

A good practice is to get at the first opportunity you have, if you can, improve or repair something in your village, that is, when you earn enough coins, do it immediately because you will be the target of many attacks and robberies.

Three consecutive sewing signs bring you the best benefit. To start building your village, you will need a lot at the beginning, so that you do not waste time and energy, you will see in the upper left how much money you have accumulated. Besides building your village, you also have many other benefits to protect and attack your opponents.

From this bar you will see how your game is going from the beginning. You may be able to attack your enemies, your goal is to destroy or steal them. When you get the pigs on the roulette wheel, you will choose who to attack but you have to bear in mind that your village will also be attacked, destroyed and stolen by other players, so with the

accumulated money, you can repair and improve it. The good thing is that you can use your coins for almost anything.

You will see on the screen who attacked you. To defend your town you will have 3 shields to repel the attacks of your friends or famous players, the **Coin Master** community has great celebrities like Jennifer López. To attack another player is carried out using a bar with a combination of 3 hammers, then you will decide from the list who is attacking or, sometimes, who will avenge her.

In **Coin Master** we will rise in the general ranking as we fight against villages and accumulate resources to continue growing, with each one that you conquer the rewards will be greater, which will give you an advantage against your enemies.

| Pros | Cons |
|---|---|
| - The game is fun. | - Some services are paid. |
| - You see who attacked you. | - There's a lot to look forward to if you waste your spins. |
| - There are good graphics. | - If you don't have spins, you can't play. |
| - You can advance fast in the ranking. | - The letters are very repetitive. |
