

Review Dota 2

Valve Corporation

Dota 2 is a free downloadable game developed by Valve Corporation in conjunction with IceFrog. Recreate the atmosphere and gameplay of Warcraft III and propose the confrontation of two teams of 5 heroes each in real time. All characters are unlocked and start battles in the same conditions

Dota 2 is one of the most important proposals that can be found among the **games and applications** on the network. The title was created by Valve Corporation together with IceFrog in 2013 and, despite the passing of the years, it is still one of the platforms with the most users on computers. Without going any further, it is still competing today for the most played title position in the history of the Steam virtual store.

The American studios, recognized by installments such as Half Life, Counter Strike or Left 4 Dead, developed in Dota 2 a fantastic world full of heroes who will face each other in hectic battles that will never be equal to each other.

Dota 2 is free to download. Users will be able to make purchases within the title if they want to add cosmetics to the characters but, and this is one of the highlights, there is no item to buy that gives advantages to other users. In other words, no one will have an advantage over anyone, no matter how much they spend money. In fact, level progression also doesn't grant more power or abilities to the player or characters. We are in the presence of a fair game, where users of similar level will be paired in each battle. The process of finding fighters with similar levels can take between 1 and 5 minutes.

One of the **advantages of Dota 2** is that all of its heroes are unlocked. Players will have more than 100 options to choose their soldiers for the battlefield. At the time of selection there is the possibility of filtering the characters by skill or complexity. It is recommended to start with those that are less difficult to use in order to get the maximum benefit from your skills. In relation to abilities, the figures are divided by strength, agility or intelligence. The choice will depend on the tastes of the user or the role he will play in the team. There is also a chance to cancel the heroes we want to face.

We mention teamwork and it is one of the points that we must stop as it is the key to achieving success in Dota 2. The mechanics of the game created by Valve is very simple and engaging. Two teams of 5 heroes each face each other with the objective of eliminating the main tower of the enemy group. Each player must choose characters that complement each other to act in coordination with their team. Communication will be essential in this title that recreates the way of playing of the mythical Warcraft III. The games last an average of 45/50 minutes but there can be 28 minutes or more than an hour.

During battles players must earn gold and experience to level up their character in order to make him stronger. In addition, before the start of each battle there is a very important moment that will be the choice of items that our hero will carry. Objects will enhance our powers and abilities. Each match is full of possibilities for both teams, this means that nothing is said until the end of the game. Never give up.

Dota 2 ensures many hours of fun but also practice. We will have to take a good time to understand the mechanics of our favorite heroes. For this reason, before starting to **play Dota 2**, the program offers a free training tutorial. The community will also be a very important element to improve in the game created by Valve Corporation together with IceFrog. It is possible to attend games as a spectator, analyze plays and even designers can make objects for the characters.

Those in charge of this popular online battle game take on the task of organizing popular tournaments, where great prizes are awarded to the best players and the most innovative designs of items and cosmetics are chosen.

If you are a person with patience, wanting to play a good strategic battle and meet people to work as a team, Dota 2 is undoubtedly one of the best options that you can **download free** for your computer. The technical requirements to be able to install them are not very high, making it a very accessible delivery for everyone.

Pros	Cons
<ul style="list-style-type: none">- Everyone has the same possibilities.- The heroes are all unlocked.- Good game mechanics.- Free download.- Good spectator mode.	<ul style="list-style-type: none">- The soundtrack is not very good.- It takes time to dominate the available heroes.- Some users are aggressive.- It can be boring for some players who prefer direct action.
