

Review Fall Guys

Mediatonic

Fall Guys is one of the great successes of recent times and brought to the market a colorful, fun and challenging proposal. With a Battle Royale type format, Mediatonic's proposal presents a competition of very well developed and original levels. It is available for consoles and computers

Among great successes and very powerful and developed video game phenomena, in 2020 a great event appeared that revolutionized the world of video games. With a proposal that is mainly based on a multiplayer competition, **Fall Guys** made an original adaptation of the Battle Royale genre, the game mode that has been the most used for years.

Playing Fall Guys is entering a colorful, fun and, above all, very complex adventure. The simplicity that the levels appear to have is not such, since achieving the longed-for crown that is given by winning the entire game is only achieved by the best players.

How do you play Fall Guys? As we said, the creation of Mediatonic is based on two well-known game modes. On the one hand, it's a typical Battle Royale where a set number of players (60 users per game) compete to see who wins the crown. Everyone starts under the same conditions and no one has an advantage over anyone. On the other hand, the delivery that is available for PlayStation 4 and computers, is supported by the mode of the mythical Mario Party. That is, the different levels are repeated and have simple and straightforward rules that involve different types of skills.

One of the **advantages of Fall Guys** is that progress and advancement are based on practice alone. The learning curve is complex as the levels are not easy to win. The only thing that differentiates the cute characters from each other are decorative materials such as costumes, colors or celebrations.

And since we refer to the protagonists of the game, we must mention the audiovisual section of the title. Without a doubt it is one of the elements to highlight. The proposal is very very colorful, strong colors such as purple, pink, yellow, red, green and blue predominate. Although the levels are repeated, each obstacle they present is developed with an excellent level of detail. On the music side, although it is pleasant it could be a little better since at times it is somewhat repetitive. It accompanies the game environment well but is not at the height of the graphic production.

Downloading Fall Guys is very simple and is even one of the cheapest options in virtual console or computer stores. The Mediatonic proposal will undoubtedly provide you with a lot of hours of entertainment with its challenging levels. The worlds that can touch you in a Fall Guys game are varied. There are two types of challenges, individual or group. Solo games are usually with a platform format in which we will have to jump, run or avoid falling. The controls are very simple and only 3 or 4 buttons are used. On the contrary, if the level you touch is a team level, they are usually challenges in which three groups are divided by color (red, yellow or blue). The rules can be to steal giant balls from enemies or have to remove the tail of the partner. This time there will be a lot of chance since winning or not depends on the skill of your teammates.

Among other original levels you can find an obstacle course with gigantic fruits or a memory challenge on falling platforms.

To **win Fall Guys** you must pass 4 or 5 levels in a row. In each of them a certain number of players is classified, reducing the number of participants in the game from 60 to 1. When you win the victory, you will win the crown. These prizes can be accumulated and then exchanged for important prizes for your character.

Fall Guys revolutionized the year with their irruption in the market. It was a totally unexpected bestseller in a field where it competes with industry giants of all stripes. What Mediatonic comes to demonstrate with this product is that

players often prefer simple, colorful and fun proposals to complex deliveries. With a fantasy-filled world packed with colors, platforms, and giant fruits, Fall Guys is certainly a challenge for even the most experienced players. Don't miss the opportunity to meet these endearing and challenging characters.
