

Review Fruit Ninja

Halfbrick Studios

Fruit Ninja is one of the most interesting free download applications on the market. Its success and acceptance was so great that it obtained releases for PlayStation and Xbox. The proposal developed by Halfbrick Studios invites us to cut as many fruits as possible with our saber. It is a game of strategy and skill

There are times when the wildest ideas can generate success in the world of **games and applications**. Unexpected proposals are capable of becoming the passion of many and one of the most **downloaded free apps** on the market. In 2010 Halfbrick studios did it with a very simple and entertaining idea like cutting fruit with a ninja saber.

Fruit Ninja is a **free download** video game. The title has been very popular since its launch. Due to the great success, the developers managed to insert their product both on mobile devices with **Android and iOS** operating systems, as well as on consoles with the virtual reality version called **Fruit Ninja VR**.

The original idea for playing **Fruit Ninja** is for touch screen. In fact, the proposal has a great response, very comfortable and agile. But it can also be played via a joystick or computer.

By **downloading Fruit Ninja** you will find a good number of possibilities to enjoy the Halfbrick product either as a multiplayer or as a single player. You even have virtual reality options available. In addition, each delivery is accompanied by very good sound effects that make the product very fun. There is no other idea that resembles a title like **Fruit Ninja**.

The objective of the game is to cut as many fruits as they fly towards you or are suspended in the air. You should not miss any fruit. Sometimes you can cut several at the same time and that will earn you more points. You have to be very careful with the bombs too, sometimes they can come towards us without any warning. As we said, the controls are very well worked. We will use a sword to cut the fruits that will be activated as we slide our finger across the screen. Depending on the direction and the force we use is how we will make the cut.

Among the **advantages of Fruit Ninja** we find that the images and graphics are quite good, even when the screen is covered with fruit. The interface is simple, streamlined, and not difficult to navigate. The gameplay is what gets you hooked on this game and keeps you coming back for more and more in order to beat your previous score. It is a very dynamic title.

Among the **Fruit Ninja game modes**, the app offers four different ones. Although the basic idea is the same, each alternative has a mode with particular characteristics.

In **Classic Mode** you can do whatever you like and you are always in the middle, generating combinations, cutting special fruits and deflecting bombs.

Arcade Mode gives you sixty seconds to slice and dice as much fruit as you can and the bomb won't kill you, but it will take seconds off your time.

Zen Mode is combo-centric. Here you get a minute and a half to score as many points as you can. There are also no bombs in this round.

Survival Mode is the most different from all the others. Instead of fruits just appearing in front of you, some little robots fly up and shoot fruits at you. It is the most difficult game option.

To cut fruit you use a sword given by your sensei. Choose the dojo you want to fight and start accumulating points, Halfbrick's delivery has earned millions of followers around the world. To make your game not boring, grab some extra items: **Peachy Time** to save some time, **Berry Blast** destroy the surrounding fruits and owls, and **Bomb Deflect**

to avoid bombs.

Some **tips and tricks** that you can take for this challenging proposal are to, for example, stay calm at all times. The games will get more and more difficult but you have to find your best rhythm for cutting food. Once you are in control of your sword, launch into more complicated missions.

Fruit Ninja is one of the best proposals to have on your mobile. A game that at first you will believe that it is to play for just a few minutes, but that will then catch you in a way that you will not be able to stop playing. Halfbrick achieves a great success with an original, simple and challenging idea.

Pros	Cons
<ul style="list-style-type: none">- Original and fun idea.- Very addictive.- Good graphics.- Different game modes.- Content updated daily.	<ul style="list-style-type: none">- Can get a bit repetitive for some demanding players.- At times it has too many ads- The server may have some problems.- In-game purchases.
