

Review Trivia Crack

Trivia Crack is a fun game for mobile devices that allows you to learn something new. Play with friends or strangers, answer questions in different categories, collecting rewards if you are better than others. You can also play on Facebook. There are 6 categories in total: Entertainment, Art, Sports, History, Science and Geography

Trivia Crack is a video game launched by the Argentine company Etermax in 2013 for Android and iOS mobiles for free. Like its predecessor, Apalabrados, it is a question-and-answer game in which the one who hits the most wins. The company is also responsible for other successful games such as Mezcladitos and Bingo Crack, among others.

It has two game modes: the Classic, two players fight to be the first to get six characters together, and the Duel version, where in a more dynamic way each one has to answer 12 questions, being multiple players, and whoever wins, answer more correct. In case of a tie the fastest wins. Each one represents a specific theme among which are: Arts, Science, Sports, Entertainment, Geography and History. To do this, they must complete a progress bar by correctly answering the multiple-choice questions, the topic of which is previously determined by the spinning of a roulette wheel.

So we say that the objective of the game is to capture six characters to win. So when you spin the wheel and start answering the questions. It will have special powers like overtime, bombs, double chance and skip options. When he answers wrong, it is the turn of the other players, but when he does, he will correct it. If you answer three questions well or you get the special crown section and you have to answer it (correctly), you get the character.

Duel is a faster mode of the game, which consists of answering a series of questions (12 to be precise). Here, multiple players compete at the same time, and the one who answers the most correct questions wins the game, in the event of a tie, the one who answers the fastest wins. He currently receives 300 coins.

The game has had a rapid expansion in Latin America, and is currently the application with the highest number of downloads worldwide, with more than 20 million downloads.

The application allows integration with a Facebook account, but this is not mandatory, since it allows users who wish to create their own accounts.

Its popularity is so high that the television show Susana Giménez incorporated it in 2014 as a competition. An app update allows you to replay the same questions that are answered live on television. The viewer who answers the most correct questions in the shortest time wins a trip to the Caribbean.

You can also choose one of the many languages ??like Spanish, English. Portuguese, French, German, Catalan and Italian. In this way, you can test your languages ??if you are a linguist. You will probably like it because it is educational and addictive. Another good category is called Achievements. You get all these achievements for certain things, like winning a certain amount of games in a row, as well as some rating and translation questions and challenges of winning friends.

Its introduction into the classrooms could have utility and benefits. Each player duels with the other while asking questions and answers. Topics may be art, science, sports, geography, entertainment, and history.

What must we do to beat our rivals and what happens if we fail

Once you give **crack download trivia** and have created the account accepting the terms of policy and privacy of the game.

The image that will appear on the screen is the first contact they will have with the game, if they click to start a new game they will have the possibility to select the language, the game mode and the opponent (they can be your friends or random people).

You have to turn the roulette where the theme of which they will ask you will appear. If you touch the crown for example, you have the possibility to directly win the character of the theme that you like the most, although you must correctly answer a question on that topic. For example in Science, which animal is used to be observed in laboratories? 1-Cats 2- Dogs 3- Rats 4- Kangaroos. By having answered correctly you win that character.

Then continue spinning the roulette wheel if you have answered the first question and you may be asked a history question such as What were thirds? 1- Unit of the Spanish army 2- Some laws 3- A typical dish from Huelva 4- None of the above

It is played against the clock and there are only a few seconds to answer each question. As you can see, having answered the question correctly, one of the 3 bars of the cursor shown below will be filled, so that when the 3 bars are filled, you will have the opportunity to try to get a character directly, either by answering a question about the character you choose even if you had fallen in the crown or challenging your rival to try to steal one of his characters in a duel of 6 questions related to the 6 themes.

Pros	Cons
<ul style="list-style-type: none">-There are a couple of different ways to play<ul style="list-style-type: none">-Challenge a specific friend-Check your rankings and progress-Test your trivia knowledge in six different categories-The content is always being updated-Send your own user trivia questions	<ul style="list-style-type: none">-Depending on what you want to buy, in-app purchases are quite expensive.-It is slow to recharge-Many ads.-Can overheat your mobile device.
